

ART IN GAZA

By Giorgio Palmera/Echo

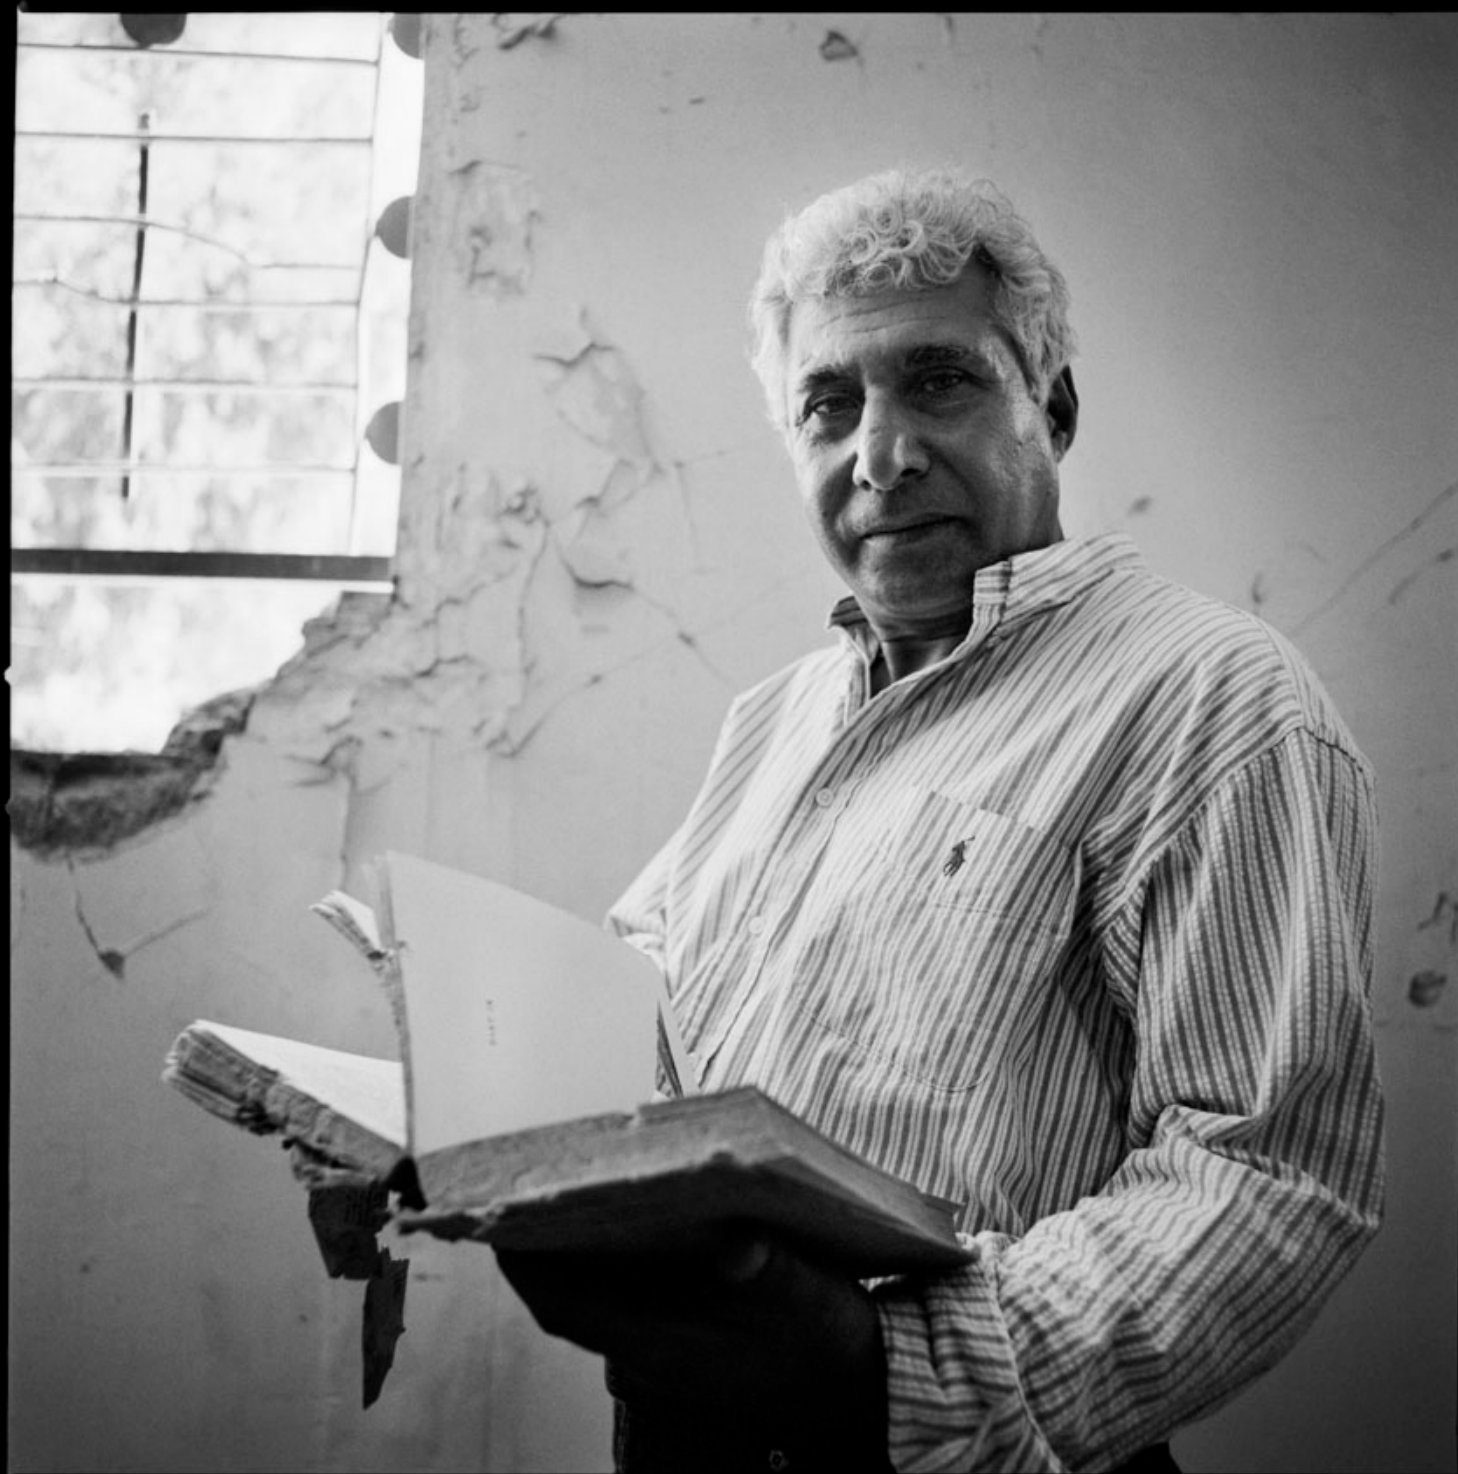

“In Gaza there exists an incredible, unimaginable, ardent artistic movement, of which, little do we know. These means of communication don't seem to speak, giving little news of death and destruction, instead of bringing to our attention the numerous manifestations, struggling peacefully and essentially in the name of art. Catching up with these artists of Gaza, I understood that art is a necessity, an urgent need and above all a concrete form of survival of expression. The only thing that these people can express against war, in conditions, armed deliberately and exclusively in peace”

Andrea Camilleri
